Boss Piatt, the artful dodger, would not express an opinion on the subject to-day.

"Excuse me," he said, "I don't want to say anything more until the State Committee has met."

"As a Republican, Mr. Platt," asked the reporter, "which faction in this city do you think is entitled to recognition."

"Up went the ex-Senator's hands, as if the question had a terror for him, and he repeated his former answer.

The epitaph of the Milholland movement is being written. The funeral will take place to-morrow, when the Republican State Committee meets 'n Parlor D R of the Fifth Avenue Hotel. Interment will be up Salt River.

It is understood that the New York City members of the State Committee, in the interest of harmony, will be permitted to decide the question of regularity. The members, with one exception, Henry Grasse, are Committee of Thirty men, and the result is a foregone conclusion, if they gain their point, as it is expected they will. Milholland hasn't got a leg to stand on to sustain his claim. His meteoric career will to me to an ignominious end.

A good many up-country committee, men are in the city. They are Chairman Hackett, of the Executive Committee, secretary John S. Kenyon, Mayor George W. Aldridge, of Rochester; W. L. Proctor, of Ogdensburg; Isaac Baker, r., of Comstocks; and James W. Wadsvorth, of Genesco. The general opinion of these men is that this is no time to yrecipitate a party fight, and their yffuence will be exercised in favor of foncillation. This is a backdown for Flatt.

Mr. Hendricks is a companion in misery, and his visit to the Parubican Central Power is important because it has an indirect bearing on the factional fight in this city.

There is a dispute between Hendricks, leader of the Platt forces in Onondago County, and Congressman Beiden, who has a machine of his own, as to which side is entitled to recognition as being regular. Both nominated independent candidates for Mayor at the last election and Hendricks's man won. Hendricks and his followers have been proscribed by Beiden as boilers, and their right to name delegates to the State Convention has been questioned.

Mr. Hendricks was asked to-day if he was willing to let the local organization settle the matter without outside interference, the same as the regular New York Republicans propose to settle their differences.

they are generally provided abundantly enough in places where they are likely to be of service, the water is very apt to be wanting, says a writer in Cassier's Magazine.

It is true, also, in a measure, that even if the palls were kept full they are often borrowed for some purpose and not returned, so that when most needed they are unavailable. As a way out of this difficulty it has been proposed to use palls with round or conical bottoms, which will not stand on a floor and are not, therefore, likely to be taken off for some use for which they were not intended, but this form extractly diminishes the value of the pail as a fire extinguisher, since a man with two of them in his hands arriving at the scene of action vannot use either with out setting the other on the floor and losing all its contents.

As an improvement on this, a superintendent in one of the large New England mills, who had found it dim rult to keep the fire pails full and in good order, some time ago adopted the following interesting expedient, of which we find an account in some scrapbook data.

The hooks varrying the pails were

lata. The hooks carrying the pails were

data.

The hooks carrying the palls were fitted up with pleres of spring steel, strong enough to lift the pail when nearly empty, but not sufficiently so to lift a full pail. Just over each spring, in such a position as to be out of the way of the handle of the pail, was set a metal point connected with a wire from an open circuit battery.

So long as the pails were full their weight, when hung on the hooks, kept the springs down, but as soon as out was removed or lost a considerable portion of its contents by evaporation, the spring on its hook would rise, coming in contact with the mental point, thus closing the battery circuit and ringing a bell in the manager's office, at the same time showing on an annundator where the trouble was. As the bell continued to ring until the weight of the pail was restored, it was impossible to disregard the summons, and no mere reason was found to complain of the condition of the fire buckets.

SPORTING MISCELLANY.

New Jersey A. C., and President Bartow S. Weeks, of the New York A. C., agreed on some very important matches at Saratoga after the last championship meeting, the races to take place at the Grand Olympiad of the New Jersey A. C., on Labor Day, Sept. 3, at the Club's grounds, Bayonne City, N. J. The most important event is the scratch 120-yard hurdle race between S. Chase, winner of the Metropolitan Championship last Saturday, at Saratoga, and F. C. Puffer, the American champion, who ran second to him. President Weeks has also to him. President Weeks has also agreed to enter Champion Cady, who is now in England with the Yale team, providing Mr. Cady can get in condition in time for the race. Sam Liebgold, of the Pastime A. C., and Tommy Letson, of the New York A. C., have both agreed to walk a match race for one mile. The third important fixture arranged is a two-mile special invitation race, President Weeks agreeing to enter George Orton and Champion Jarvis, while Willie Day will hold up the New Jersey end. Day is the champion invemile runner, and George Orton believes that two miles is his best distance. It is also expected that Charles Kilpatrick, the half-mile champion, will get himself fit for this race. Handsome prizes will be given to the winner in each event. Mike Murphy, the popular trainer of the New York A. C., who was at Saratoga with the boys, has promised to keep them in fine trim.

The six-round go between Dick Moore, of Boston, and Jack Power, of St. John. N. B., last night, was the greatest exhibition of slugging ever seen in the latter city. Moore knocked Power down in the second round, but the remaining four rounds were about even, and the fight was declared a draw. A telegram was read at the ring from Dick O'Brien's backer, offering to back him against either man. Moore declared that he would accept the offer for \$1,000 at 158 pounds.

Patsey Broderick, of Providence, and Price Williams, of Boston, fought six rounds in Providence last night Williams was unmercifully punished from start to finish, and in the sixth round was sent to the floor, screaming in agony and covered with blood. His left eye was closed in the beginning.

There was no listlessness about Shoch in cen-

that will take the spell off Vigilant.

J. W. McAlduff, a Vigilant admirer, writes to criticise the action of the Goulds in sailing races on the other side during the fickle winds of Summer. He yearns for a trial on outside water, and in October breezes. He and many others on this side of the water will probably be gratified, as Vigilant is not likely to return before next Spring, at least. It is almost a certainty that she will sail in the Mediterranean regatta, off Cannes.
